Appl. No.: 10/803,461
T.D. Dated: 06/16/2008

shortened by any terminal disclaimer filed prior to grant, of any patent granted on any of the following pending U.S. patent applications:

11/009,700 filed on 12/10/2004

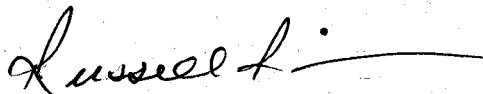

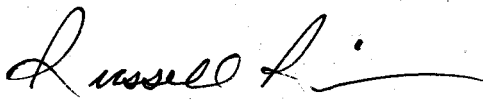

The owners hereby agree that any patent so granted on the instant application shall be enforceable only for and during such period that it and each patent granted on the foregoing pending applications are commonly owned. This agreement runs with the patent granted on the instant application and is binding upon the grantee, its successors and/or assigns. In making this disclaimer, the owners do not disclaim any terminal part of any patent granted on the instant application that would extend to the expiration date of the full statutory term as defined in 35 U.S.C. § 154 to 156 and 173 of any patent granted on any of the foregoing patent applications, as shortened by any terminal disclaimer filed prior to the patent grant, in the event that any such granted patent: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid by a court of competent jurisdiction, is statutorily disclaimed in whole or terminally disclaimed under 37 CFR 1.321, has all claims canceled by a reexamination certificate, is reissued, or is in any manner terminated prior to the expiration of its full statutory term as presently shortened by any terminal disclaimer filed prior to its grant.

For submissions on behalf of an organization (e.g., corporation, partnership, university, government agency, etc.), the undersigned is empowered to act on behalf of the organization.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
